

# Donation App (Vite + Node + Razorpay)

---

A full-stack donation platform built using **Vite React** for the frontend and **Node.js + Express** for the backend.

This app enables users to **make or receive donations** securely via **Razorpay** (Test Mode integration).

---

## 🚀 Features

- 🌐 Modern UI built with **Vite + React**
  - ⚙️ Backend API powered by **Node.js & Express**
  - 💻 **Razorpay test mode** integration for secure payments
  - 👤 Two roles — **Donor** and **Receiver**
  - 📦 End-to-end full-stack architecture
  - 🔒 Environment variables for secure credentials
  - ☁️ Easily deployable on **Vercel, Render**
- 

## 🏗 Tech Stack

### Frontend

- React + Vite
- Axios for API calls
- TailwindCSS

### Backend

- Node.js
  - Express
  - Razorpay SDK
  - MongoDB (via MongoDB Atlas)
-
